

PROJECT PROFILE

CHINATOWN AND BRUNSWICK ST MALLS

Fortitude Valley - Brisbane City
Government - Local Government

FAST FACTS

CLIENT	Brisbane City Works
SCALE	Beautification of the popular Chinatown and Brunswick St 'Valley' Malls
DISCIPLINES	
HIGHLIGHTS	<ul style="list-style-type: none"> Adapted data output to meet and exceed desired specifications Ability to capture data in high vehicular and pedestrian traffic zone whilst minimising safety risks Project completed ahead of schedule, within budget and to high quality level.

In order to beautify the popular Chinatown and Brunswick St Malls in Brisbane's Fortitude Valley, the Local Government Client required JFP to undertake a highly detailed survey to exacting specifications using sophisticated equipment (Leica 1200 series with robotic and reflective technologies). By placing a highly experienced team who had long term experience on both local and state government work, the project was able to be completed ahead of schedule, within budget and with data presented to a level well above expectations.

One of the challenges on the project was the management of the potentially high risk work environment due to the high vehicular and pedestrian traffic that passed through the popular 'Valley' entertainment precinct. JFP's ability to draft and execute a plan to manage workplace health and safety issues on site was an important component for successfully completing the project.

Working on the 'Valley' Mall projects reinforced JFP's experience in working on complex and high profile site on behalf of government entities. The project also displayed JFP's ability to adapt to new standards requested by government authorities which may be required for unique projects.
