

PROJECT PROFILE

NAMBOUR GENERAL HOSPITAL

Nambour - Sunshine Coast
Institutional - Hospital

FAST FACTS

CLIENT	Watpac and Project Services
SCALE	96 bed, 5 storey extension to existing General Hospital
DISCIPLINES	
HIGHLIGHTS	<ul style="list-style-type: none"> • Extension to largest operating hospital on the Sunshine Coast • Precise measurement of existing structures to enable design of extension without disrupting operations

JFP was initially appointed by the Queensland Government (Project Services) to provide an accurate survey of existing hospital structures and surrounds so as to allow the design of a 96 bed extension to the Nambour General Hospital. Importantly the survey was undertaken without any disruption to Hospital Services. JFP was then requested by the Project Builder (Watpac) to remain on the project to provide responsive and accurate survey set out during construction. JFP's ability to work closely with the Project Builder facilitated the completion of the project ahead of schedule.

A key to its success on the project was JFP's ability to systematically and precisely monitor and implement a large number of construction design amendments produced on a regular basis. These amendments gave the Project Builder the flexibility required to adopt innovative construction and programming techniques so as to fast track the project in order to beat government deadlines.

The Nambour General Hospital Project is an example of JFP's ability to work with Project Builders in a responsive manner that facilitates the delivery of fast tracked projects. It also is evidence that JFP understands the specific requirements of Hospital and Health Care Projects.
