

PROJECT PROFILE

PETRIE STATION

Petrie - South East Queensland
Government - State Government

FAST FACTS

CLIENT	Queensland Rail (QR)
SCALE	Upgrade of Railway Station & surrounds
DISCIPLINES	
HIGHLIGHTS	<ul style="list-style-type: none"> • Timely provision of survey data to QR standards • Upgrade carparks, platforms and pedestrian overpass

JFP was approached by QR to provide survey services to facilitate the upgrade of the Petrie Railway Station. The project involved an upgrade to the car parks surrounding the station, to the platforms and to a pedestrian overpass. JFP's long term experience on QR Projects ensured data was submitted exactly to QR's rigid specifications.

JFP provided precise data to QR from a wide range of survey types including Contour & Detail, Services, Railway Corridor, Structural, Identification, Control and Tree Surveys. One of the major aspects of JFP's work on the project was providing the services in a manner which ensured the continued safe operation of the rail system and staff on the project. All survey data from the project was delivered to QR ahead of schedule.

The Petrie Station Upgrade Project is just one example, selected from numerous similar projects, which illustrates that JFP is able to assist with the delivery of rail related infrastructure on behalf of Government Entities.
