

PROJECT PROFILE

QUEENSLAND POLICE ACADEMY

Oxley - Brisbane City
 Government - State Government

FAST FACTS

CLIENT	Project Services
SCALE	Ongoing extensions to Queensland's largest Police Academy
DISCIPLINES	
HIGHLIGHTS	<ul style="list-style-type: none"> ▪ Detailed survey of large and complex site ▪ Major wetland survey; including the use of an Aquatic Weed Harvester ▪ Easement surveys for access and utilities ▪ Primary control for construction

JFP receives requests from Project Services to assist with its delivery of government buildings/projects on a regular basis. A project worth noting is the QLD Police Academy where JFP has been providing survey services over the large and complex site to facilitate its ongoing expansion.

One of the most interesting components of the project to date has been a Wetland Survey conducted by JFP. A large wetland area could not be surveyed through the use of traditional hydrographical methods due to overgrown vegetation; which limited access to the underwater terrain. JFP creatively utilised an Aquatic Weed Harvester, with a custom built depth gauge attached, to map out the extents and depth of the wetland area precisely.

JFP has undertaken a range of activities on behalf of the Queensland Government over the years across its full range of disciplines. These include, amongst others, providing Planning, Urban Design, Engineering and Landscape Architectural Services on Department of Housing Projects managed by Project Services. The length and range of experience gained by JFP on State Government Projects, and its status as a Pre-Qualified Consultant, makes JFP well credentialed to provide consulting services to Government Projects into the future.
