

## PROJECT PROFILE

# RAILWAY INFRASTRUCTURE

South East & Central Queensland  
Infrastructure

### FAST FACTS

CLIENT	Queensland Rail (QR)
SCALE	Various - including station upgrades & line duplications
DISCIPLINES	
HIGHLIGHTS	<ul style="list-style-type: none"> <li>• Timely provision of survey data to QR standards</li> <li>• Establish control and document to QR requirements</li> <li>• Upgrades to carparks, platforms and pedestrian overpass</li> </ul>

In recent times, JFP has provided survey services to Queensland Rail, either directly or under the direction of QR appointed Project Managers, on projects as diverse as station upgrades to line duplications.

JFP has provided precise data to QR for a wide range of survey types including Contour & Detail, Services, Railway Corridor, Structural, Levies/ Identification, Control and Tree Surveys. One of the major aspects of JFP's work on QR projects is providing the survey services in a manner which ensures the continued safe operation of the rail system and staff on the project. On a majority of projects, survey data has been delivered to QR ahead of schedule.

The significant number and variety of railway projects undertaken recently proves JFP's ability to assist with the delivery of rail related infrastructure to a high standard, in a variety of formats suitable for design consultants.
